

A WEBSITE FOR PERSONALIZED CONTENT

(Submitted by- Diya Garg (11))

DATE: Sept 22, 2022

Project Idea:

Expressing emotions into words is not a cup of tea for everyone. Facilitating an online portal to cater to the word-ly needs of the consumer by taking keywords to get an abstract idea of their feelings.

Must-have features:

- User log-in page and authentication
- Well defined about us and services page
- Responsiveness for all devices
- Free pre written work for certain keywords
- Search and Filtering option
- Minimum 2 write-ups provided for every set of choice(s)

Good to have features:

- User friendly interface
- Payment Gateway
- Feedback
- Content customisation option delivery
- Testimonials

DATE: Oct 7, 2022

Users have two categories:

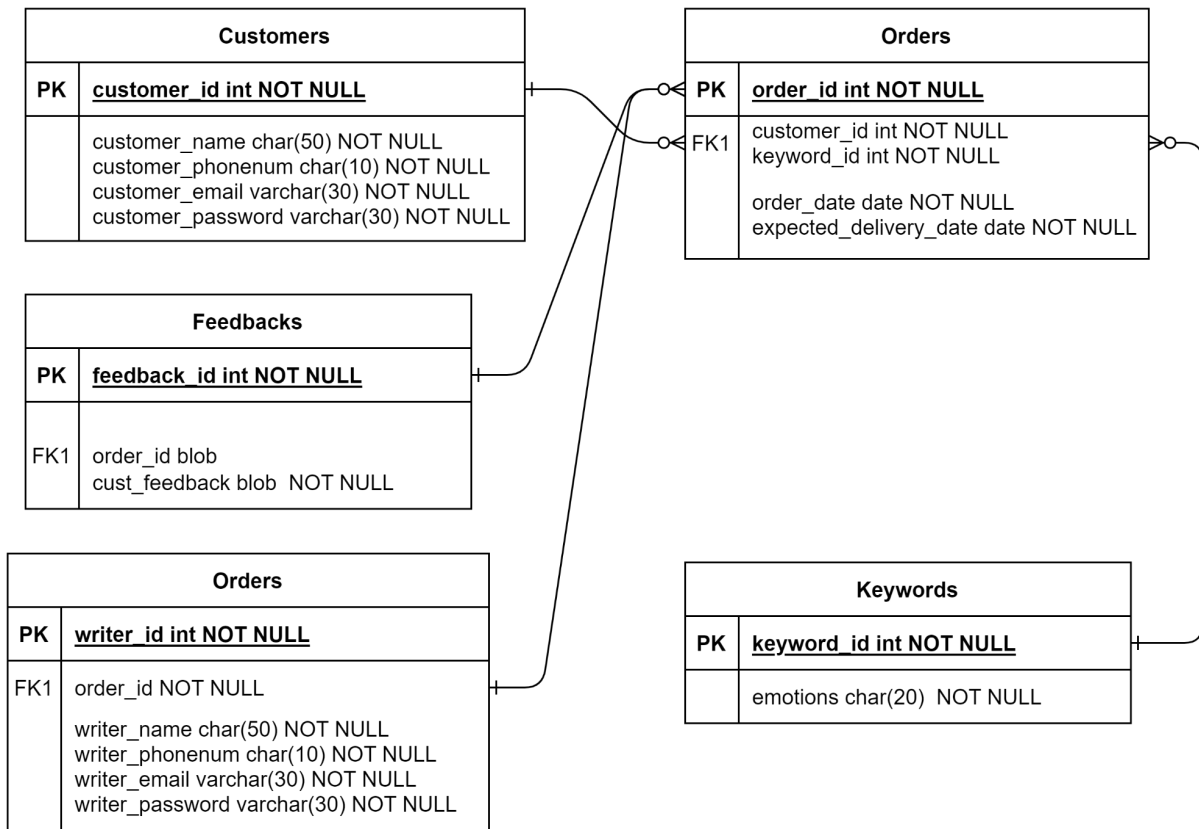

1. Content Writers
2. Customers

SignUp and Login is common to both the categories of the users. After successfully logging in to the portal, a customer can select 0-3 keywords from the list of keywords available. The keywords are assigned to an available writer and chosen keywords and expected delivery time is mailed to the consumer. The 2 write-ups are delivered to the user on its registered email and one time modification/customization is allowed on of the templates sent.

BASIC FLOW OF THE DATA:

Customer logs in with the verified credentials and submits the keywords. The keywords are sent to an expert and expert prepares 2 write-ups incorporating the keywords and it is then mailed back to the user upon which one time customization is allowed. The final write-up is then sent an service is completed. User can feel free to provide a feedback.

SCHEMA:

PROCESS INVOLVED:

1. Authentication
2. Selecting from a list of values
